MEET THE TRAINER

DAVE KREGER

Dave is a NETA Level III and a PEARL Level II Certified Technician. He serves on the Board of Directors and several committees for both the InterNational Electrical Testing Association (NETA) and the Professional Electrical Apparatus Reconditioning League (PEARL). He has over 25 years industry experience and is our Director of Operations and Client Solutions.

OVERVIEW

TRAINING OBJECTIVE

To increase safety awareness for individuals coming in close proximity to energized electrical systems. Emphasis will be placed on Arc Flash Procedures.

OSHA RULES AND REGULATIONS

OSHA rules and regulations will be covered regarding qualified individuals, training, job briefings, and working on or near exposed energized parts. Particular attention will be placed upon minimum approach distances, protective insulation, equipment and apparel, including arc flash awareness, safeguarding, and appropriate protection.

ELIMINATE ELECTROCUTION & SHOCK HAZARDS

Proper electrical clearances and grounding for employees will be discussed with the intention of eliminating electrocution/shock hazards for employees working on or near energized electrical equipment.

MANDATORY ELECTRICAL CONTACT RELEASE TRAINING INCLUDED
